

## Solar Power Tax Credit

Receive up to a 30% tax credit from the U.S. federal government when you invest in a solar-powered gate operator. This credit is part of the Residential Clean Energy Credit, which provides incentives for using clean and renewable energy. By utilizing solar panels or other forms of clean energy, you could be eligible for the Solar Power tax credit.

### **How it works:**

The US Federal Government offers a Residential Clean Energy Credit that equals 30% of the cost of new and qualified clean energy property installed in your home from 2022 to 2032. The percentage rate goes down to 26% in 2033 and 22% in 2034.

This Residential Clean Energy Credit is offered to select gate operators that are solar-powered **only**.

**What is covered:** The solar tax credit applies to the complete installed cost of the solar gate opener system, including the solar panel, opener, access control device, remote controls, obstruction detection device(s), labor, ect.

**What is not covered:** This does not include the cost of the gate itself or the expenses associated with preparing the physical gate for operation, such as leveling, hinge replacement, etc.

### **Qualifications:**

If you have made clean energy improvements to your main home (such as installing a solar-powered gate operator) whether you own or rent, you may qualify. This applies to new or existing homes in the United States.

You can't claim the credit if you're a landlord or property owner who does not live in that home.

Second home improvements may qualify for the credit if you live in the home part time and don't rent to others. Property must be located in the United States to qualify.

### **If you own a Business:**

- If your property is for business purposes only, you do not qualify for the credit.
- If you use your home partly for business, you may be eligible for a partial credit.

### **How to Claim the Credit:**

Include Form 5695 with your tax return to claim the credit. You must claim the credit for the tax year when the operator was installed, not purchased.
