## #6030 Basic Mounting Plate Installation

### Materials Included:

6 - tek-screws, stainless steel  
Plate (2-pieces)

Determine gate width allowing approximately 1" for the latch side of the gate plus an allowance for the gate hinges you are using. **Be sure to include a horizontal brace in the area of the mounting plate.** Ornamental gates should not need horizontal bracing.

Build and stretch gate. Attach mounting plate to inside of gate by using the six tek-screws provided. (Hint - drilling pilot hole first into thick wall pipe will make it easier to install tek-screws.)

Exit bar head needs to be installed 2" from edge of plate and approximately 10" from the bottom of the plate. Location of exit bar will determine if machine screws or tek-screw will be used to attach to mounting plate. Exit bar height is approx. 40 - 42" to floor. **Please check your local building code for specific height requirements.** If the exit bar is too wide to fit gate, cut end of bar to make shorter. Prime and paint cut end.

- **The installation of a transom over the gate for added stability is recommended.**

## Part # 6020 Strike Latch Receiver Bracket Installation

### Materials Included:

- 1 -Receiver
- 1 - 3/8" U-bolt stainless steel
- 2 - flat washers
- 2 - 3/8" cap nut stainless steel
- 2 - tek-screws, stainless steel
- 2 - 1/4-20 machine screws, stainless steel

Install strike latch onto receiver using machine screws provided. After mounting plate and panic bar are installed on gate install receiver on latch post by using u-bolt with flat washer and cap nuts. Adjust so that exit bar latch hits the strike and that the dead latch hits outside the catch area. Check for smooth operation and secure latch bolt engagement. When in proper location install two tek-screws through receiver and into post.

**Receiver must act as a gate stop.**

Guards are available for extra security or for gaps greater than 1" at an additional cost.

## Part # 6030 Standard Kit No Lock Box

Install mounting plate to inside of gate by using six tek-screws.

Remove screws from head cover.

Panic bar head should be 1 1/2'' from the edge of mounting plate. Attach exit bar with 2 tek-screws or 2- 1/4'' x 3/4'' machine screw and nylon lock nuts.

Re-install cover.

Cut length of bar down to fit gate, if needed. Install back holding bracket with tek-screws or machine screws.

Install tailpiece trim.

Adjust and install gate receiver bracket using U-bolt. Attach to post with tek-screws.

Receiver must act as a gate stop.

# EXIT DOOR HARDWARE

Stainless steel fasteners provided

CHAIN LINK - OR - ORNAMENTAL GATE

"DETEX" EXIT BAR with ALARM (9 volt battery)

"DETEX" EXIT BAR

EXIT BAR

Adjustable MOUNTING PLATE  
32" to 54" wide Gate Frame
